### BAKERSFIELD OVERVIEW

Bakersfield is a city in California and the county seat of Kern County. It covers about 142 square miles near the southern end of the San Joaquin Valley and the Central Valley region. Bakersfield's population is approximately 365,000, making it the ninth-most populous city in California and the 52nd-most populous city in the nation. The Bakersfield–Delano Metropolitan Statistical Area, which includes all of Kern County, had a 2010 census population of 839,631, making it the 62nd largest metropolitan area in the United States. The more built-up urban area that includes Bakersfield and areas immediately around the city, such as East Bakersfield and Rosedale, has a population of approximately 464,000.

The city is a significant hub for both agriculture and oil production. Kern County is the most productive oil producing county, and the fourth most productive agricultural county (by value) in the United States. Industries include natural gas and other energy extraction, aerospace, mining, petroleum refining, manufacturing, distribution, food processing, and corporate/regional headquarters.

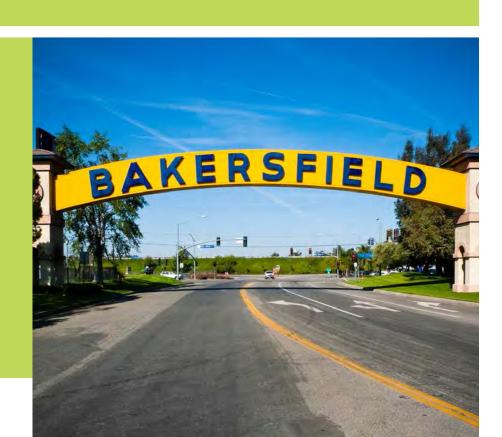

Between 1970 and 2010, Bakersfield grew 400% (from 70,000 to 347,483), making it one of the fastest growing cities in California.

Bakersfield's proximity to mountain passes, primarily the Tejon Pass on Interstate 5 between the Los Angeles metropolis and the central San Joaquin Valley, has made the city a regional transportation hub.

In 1990, Bakersfield was one of ten U.S. communities to receive the All-America City Award from the National Civic League.

In 2010, the Bakersfield MSA had a gross metropolitan product of \$29.466 billion, making it the 73rd largest metropolitan economy in the United States.

Bakersfield lies around 100 miles (160 km) north of Los Angeles (about a  $1\frac{1}{2}$ -hour drive on I-5 and State Route 99) and about 300 mi (480 km) southeast of the state capitol, Sacramento (about a  $4\frac{1}{2}$ -hour drive on State Route 99).

# AREA OVERVIEW

### **ECONOMY**

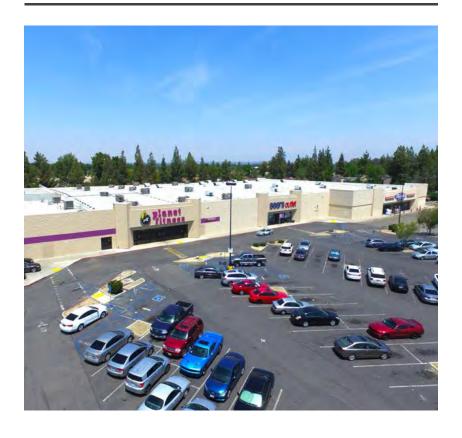

Bakersfield's historic and primary industries have related to Kern County's two main industries, oil and agriculture. Kern County is the most oil productive county in America, with around 10% of the nation's domestic production. Kern County is a part of the highly productive San Joaquin Valley, and ranks in the top five most productive agricultural counties in the nation. Major crops for Kern County include: grapes, citrus, almonds, carrots, alfalfa, cotton, and roses. The city serves as the home for both corporate and regional headquarters of companies engaged in these industries.

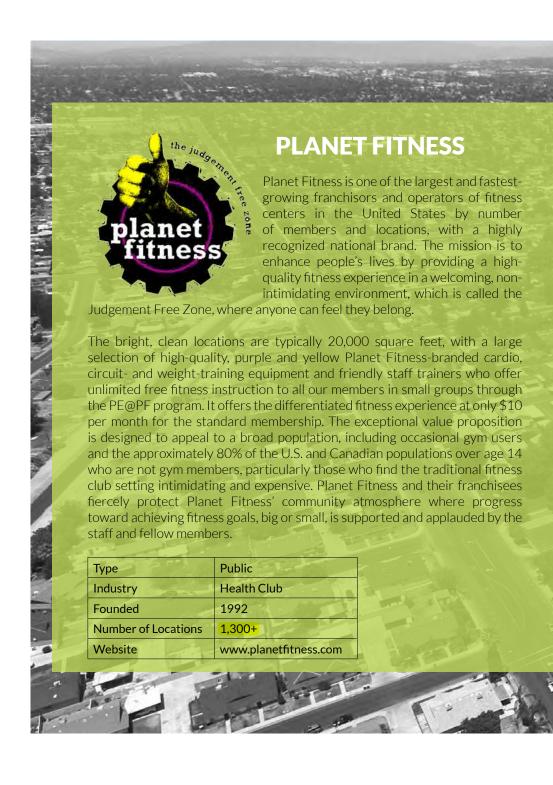

Bakersfield also has a growing manufacturing and distribution sector. Severalcompanies have moved to Bakersfield because of its inexpensive land and access to the rest of America, as well as international ports in both Los Angeles and Oakland. Other companies have opened regional offices and non-oil/agricultural businesses because of Bakersfield's and Kern County's business friendly policies, such as having no local utility or inventory taxes. Products manufactured in the city include: ice cream (world's largest ice cream plant), central vacuums, highway paint, and stock racing cars.

Bakersfield is the largest city with the lowest sales tax in California at the state minimum of 7.25%.
